

1、Download the app from the application market, and the distribution network needs to open the app location to access it

(1) Android: Settings ->Select Location ->Select Remain Charged APP ->Select the 'Allow only while using the app' option

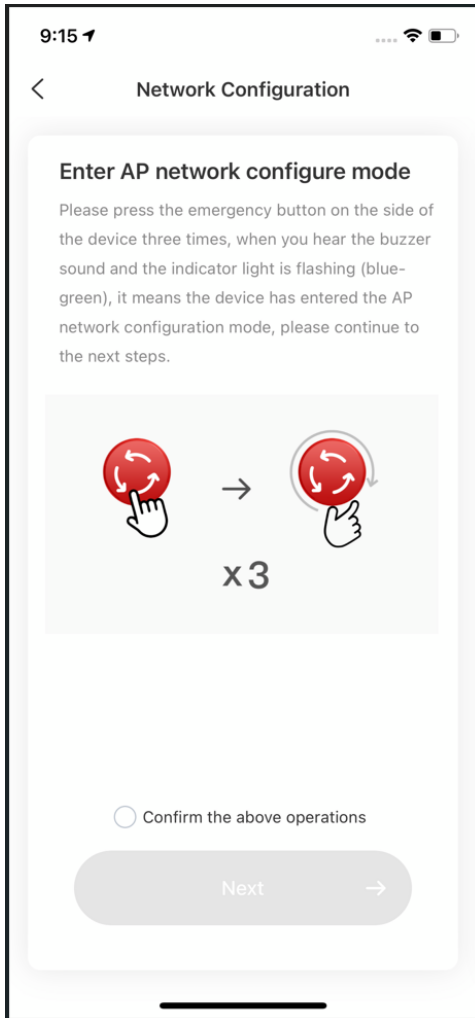

(2) IOS: Settings - Find the Remain Charged APP at the bottom, click to enter the settings, Check "While Using the App" for the location information permission option

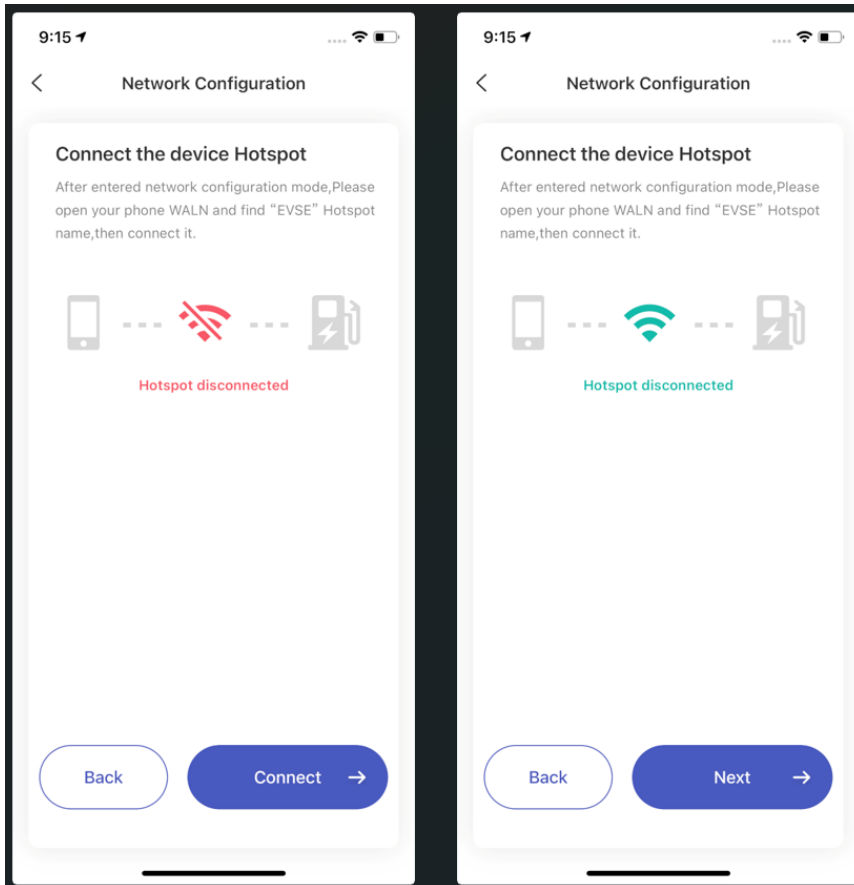

2、Network configuration

(1) Enter AP network configure mode.

Please press the emergency button on the side of the device three times, when you hear the buzzer sound and the indicator light is flashing(blue green),it means the device has entered the AP network configuration mode, please continue to the next steps.

(2) Connect the device Hotspot  
After entered network configuration mode, Please open your phone WALN and find "EVSE" Hotspot name, then connect it.

(3) Enter the WiFi name and password, and click the next button (please ensure that the WiFi is connected to the "EVSE" starting WiFi released by the charging station)
